

**We don't ever need to see this... ever...  
not one single time in the future!**

# SECURITY PERSONNEL AT SCHOOLS, COLLEGES AND UNIVERSITIES ARE GOING TO NEED NEW TRAINING AND DETECTION EQUIPMENT.

Our hearts go out to all the children who are going to be slaughtered in the near future when terrorists begin their onslaught in the USA using high-tech RF/EMF weapons. It will happen... not because we are unable to avoid it, not because we are unwilling to do what it takes to avoid it... but because we have been purposely 'kept in the dark' about this most terrifying threat for the sake of 'national security' and fear of a 'nationwide panic'. The majority of responsible people would most likely remain unprepared... if it wasn't for NxDef. NxDef is providing this critical information, but very discretely and only to verifiable U.S. citizens who pass a national security background check.

Prevention first requires awareness, then foresight, followed by planning and budgeting for the new equipment and training programs necessary for all security personnel and teachers who work for schools, colleges and universities. Our mission at NxDef is to inform these people... and all legal citizens the USA... that these new high-tech RF/EMF weapons exist and have already been used.

Like many traditional weapons, these weapons were developed in secret, starting about 80 years ago, by our own (and foreign) government agencies and their militaries. We have absolutely NO problem with military forces or even law enforcement using these types of weapons to defend our soldiers and our citizens. But, as always seems to happen, our technology falls into the wrong hands, or somebody sells it to them in secret agreements specifying they will be used against 'mutual enemies'. We have seen how our 'allies' can quickly become our staunch enemies. Our enemies are sending out millions of their minions hidden inside groups of refugees currently being welcomed into the USA with open arms (human arms, not fire-arms unfortunately) and then given carte blanche to attack us from within.

***AND... THAT'S EXACTLY WHAT'S HAPPENING, ISN'T IT?***

And so, once again, we must defend ourselves at local levels; our schools, churches, workplaces and even our homes. If our governments come to take firearms away from law-abiding US citizens, leaving them completely defenseless when terrorists come calling, they already have the RF/EMF weapons to simply disable us first. *Nice... real nice.* How wonderful. And what an excellent job all of our highest elected officials have done (maybe for themselves... certainly not for us). They should vote themselves more raises, exempt themselves from their government-sponsored healthcare programs, exempt themselves from following the very laws they pass for all of us to follow... and they should all have armed, trained security personnel to protect them and their families 24/7... and their children while at school!

***OH WAIT... THEY'VE ALREADY DONE ALL THOSE THINGS!***

We encourage all school officials, all security personnel, all parents of children currently attending schools, colleges and universities (public and private)... to do the research necessary to inform yourself of this new threat. The more research you do, the more you will discover it is real! And, the more you will recognize you need to take your own preventive action to assure your campus is not targeted with an RF/EMF weapon.

We are here to help you. We have the detection equipment. We have the training programs on video that will get you started. Information... and help with implimentation... is only a few clicks away. Every day you procrastinate, you risk your life and the lives of others.
